

# **Pola Video Privacy Policy**

"Pola" or "Pola Video" does not collect or store any of a user's personal data. All videos and photos uploaded to "Pola" are stored locally on a user's device. This media is not externally sent anywhere. "Pola" does not access any media on a user's phone other than the ones a user selects in the app. Additionally, a user can record a video through the app itself, which is still stored locally like any other video. Again, the video or video contents are not sent outside of the user's phone.
